

Material Studies:

[SAMPLE\_darkPanels+warmConcrete] and [SAMPLE\_lightPanels+coolConcrete] are included primarily to give everyone an idea of the degree of the panel perforation as currently represented.

The [TEST] files are varied pairings of concrete and panels in different tones. Note that to date, the catwalks have been represented as simple masses. Two images in this series [TEST\_lightPanels+coolConcrete\_betterCatwalks] and [TEST\_darkPanels+coolConcrete\_betterCatwalks] are better approximations of the visual impact of the catwalk/panel-support as currently designed.
