P R E F A C E .

IN presenting to the Public our MELBOURNE DIRECTORY for 1858, we beg, as an apology for the slight delay in its Publication, to draw attention to the immense number of alterations: they have so much exceeded anticipation that, on comparing this year's Publication with that of 1857, they will be found equal to Fifty per Cent.

The whole has been thoroughly Revised, and among the additions and emendations made to increase its usefulness we would point out one of some importance—namely, that of the several Partners constituting a Firm being inserted, not only under the name of the Firm, but also in separate Alphabetical order.

In the Suburban Portion the Districts of EAST MELBOURNE and RICHMOND have been added ; and all the Public and Official Information inserted in the body of the Directory.

In short, we trust that the Public generally will feel satisfied that no endeavours have been spared on our part to render it a trustworthy Work of Reference, and we have once more to tender our thanks for the readiness with which the Official and General Information has been furnished to us.

SANDS & KENNY,
Publishers.

THE GARDEN.—Cucumbers should now be watered, but not over the leaves, and always after sunset. Sow succession crops, and transplant where necessary. Prick out celery in the trenches, care being taken to select the finest heads; also plant out lettuce and endive. Collect seeds where ripe, and bend down the heads of onions, if drooping. All the beds should be well looked to and weeded, and this is the best time for making walks. All surplus shoots and spurs should be carefully removed from the grape vines. Those running too high should be lopped off, as also the straggling branches; and when the foliage is too thick, some of the leaves should be removed.

THE FIELDS.—This is the last month for getting in the barley crop. Continue to cut and cure tobacco. Hops are now fit for picking, and the maize crop will require to be carefully attended to.

This is the latest month for planting celery. Examine vines as the grapes continue to ripen, and when the leaves are too thick they should be removed. Prune away lateral shoots, and see that all others are in their proper places. Wall and espalier trees should now be carefully attended to, and all loose branches carefully secured. Early flowering bulbs may be planted during this month.

THE FIELD.—Sow mangel wurtzel, and towards the end of the month sow wheat. Maize, in forward districts, is now beginning to ripen. Attend to the sweating and curing of tobacco. Sow Cape barley, tares, &c., for early spring food.

THE GARDEN.—This is one of the most active months in the year for horticultural operations. All vacant ground should now be prepared by digging or trenching for the crops of the ensuing seasons, and the requisite dressing of manure must now be laid on. Crops for early use may be put in, and successional crops sown or transplanted when necessary. The spinach beds should now be thinned out, the ground forked between the rows, and well watered with liquid manure. If early asparagus be required, it should now be looked to and forced. Continue to earth up celery plants. Fruit trees, generally, may now be pruned; but care must be taken not to remove any of the wood till it is ripe.

THE FIELD.—Continue to sow wheat, but do not defer it longer. Sow also Cape and English barley. White and yellow turnips are now fit for pulling. This is a good season for felling and splitting timber.

THE GARDEN.—Sow two crops of peas, beans, prickly spinach, cabbage, carrots, radishes, and small salad. For the second crop sow early peas and early York, as also large sugar-loaf cabbages. Transplant cabbages, cauliflowers, leeks, onions and eschalots, strawberries and artichokes. Continue the general pruning, and remove and transplant fruit trees where wanted. Divide the roots of and otherwise propagate the various kinds of herbageous plants.

THE FIELD.—Sow spring barley, but in fine soil. Continue cross ploughing for peas, and the breaking-up of new ground for maize. Fallows intended for turnip should also receive a cross ploughing of good depth. The time is also favorable for forming ditches and underground drains, which are of essential necessity in soils having a substratum impervious to water.

THE GARDEN.—Continue to make fresh plantations of cabbages, and draw earth to those crops formerly planted. Make a plantation of Savoy, Scotch kale, Brussels sprouts, and red cabbage. Sow more cauliflower seed, and transplant those remaining in the seed beds. Sow a general crop of carrots and parsnips. Select out some of the finest roots to produce seed. Sow celery, parsley, radishes, pot-herbs, small salad, spinach, and peas. Prune plum, and graft fruit trees. Sow seeds of the hardy annuals, and continue to dig flower borders.

THE FIELD.—Sow peas as early possible. Sow tobacco and protect the young plants from frost. Continue preparing ground for maize; that which has borne turnips should be cleared, and sown with English barley, about three bushels to the acre. Rye may now be sown, and the wheat crops rolled. Hop plants will require cutting and dressing; select best sets for planting.

THE GARDEN.—Sow kidney beans and scarlet runners. Transplant leeks, cabbages, and savoy. Sow turnips and early white and purple broccoli. Peas, beans, and other plants should be hoed up. Chili pepper, capsicums, and tomatoes, may be sown in boxes or on a warm border. Everything will now require watering at an evening, but care should be taken not to wet the plants. Where nectarine or peach trees are too much crowded with fruit, they must be thinned. Destroy all weeds as they make their appearance on the borders and finish all kinds of flowerseeds.

THE FIELD.—Finish the planting of maize and potatoes as early as possible. Ground on which timber is felled and burned should now be ploughed, for the purpose of receiving wheat in the following autumn. Fallow ground for turnips may now be harrowed down, and afterwards ploughed into ridges.

THE GARDEN.—The operations of last month may be repeated here, especially if the weather should be moist. Continue the sowing and transplanting of successional crops of every description. Vacant ground should be prepared for fresh crops, and plants earthed up, and if necessary, watered every evening. The tomatoes and capsicums should be transplanted into a rich fine mould with a warm but sheltered aspect. Asparagus will soon be ready, but care must be taken not to cut the underground roots or tubers. Globe artichokes are also fit for cutting. Remove all useless shoots from the various growing trees, retaining those necessary for the next year's supply. Cut up all weeds as they appear, and continue the transplanting of the several kinds of annuals, biennials, perennials, and herbaceous plants.

THE FIELD.—Attend carefully to young tobacco, and well clean the ground. Finish ploughing new land, and at the end of the month Swede turnips may be sown.

THE GARDEN.—Sow more peas in moist weather, and seeds of sugarloaf and other quick growing cabbages. Plant out others from the seed beds. Gather medicinal and other herbs. Finish cutting asparagus. Plant celery in trenches to bleach. Sow a crop of turnips, and hoe and thin the crops formerly sown. Transplant leeks and lettuce, and keep up successional crops of radishes. Continue to pay attention to the fruit garden, as recommended last month, and place sticks to trees newly planted, or likely to be affected by the winds.

THE FIELD.—Finish sowing Swede turnips, when they are in rough leaf, the ground should be well rolled; and, after being harrowed, give them a first hoeing, and set them out wide. The maize crops and potatoes must now be charred and earthed up, and tobacco plants attended to, by pulling out suckers and removing the superfluous leaves.

THE ILLUSTRATED
News Letter of Australasia,

Published Monthly, Price Sixpence :

A Narrative of Events, indicating the spirit and progress of the times.

THE News Letter forms a concise summary, convenient for those who have not sufficient leisure to narrate with their own pen, to their friends, all the interesting events transpiring in this country.

While complaints are very general of the uncertainty of newspapers being transmitted and delivered by post, there is now great confidence in the safe delivery of letters; and it will be observed, that, as the News Letter is printed on two sheets of superfine thin post paper, weighing under half an ounce, with blank space for private correspondence, it affords a ready medium for all persons to communicate with their friends.

Published on the 2nd of January, 1858, price One Shilling,

THE FIRST NUMBER OF THE

ILLUSTRATED MELBOURNE NEWS:

A Weekly Journal of News, Politics, Art, Literature, and Science.

Liberal and progressive in politics; eclectic in literature; honest and impartial in criticism; aiming at a high standard in questions of taste and matters of art; zealous for the advancement of science; thoroughly, but not exclusively, Victorian in sentiment; and disposed to co-operate in every movement which promises to promote the moral, intellectual, social, and material advancement of the Colony, the ILLUSTRATED MELBOURNE NEWS proposes to carve for itself a path of usefulness parallel to, but not interfering with, those occupied by its contemporaries.

As an Advertising medium, it is believed that the ILLUSTRATED MELBOURNE NEWS presents advantages of a peculiar character. The weekly numbers will be preserved for binding, and the large circulation which it will unquestionably attain will speedily place it in the same position in this Colony which its British prototype occupies in the mother country.

Deposit, Estate, and Agency Bank.

The mutual improvement of money in securities of intrinsic value is peculiar to the Deposit Department of this Institution; there is no exclusiveness as to Depositors, nor limitation as to sums deposited.

Deposit

May begin with One Pound, or with any amount of Capital, and it may be increased at pleasure—the Institute affording ample means for safe and profitable investment, with a certainty of yielding a liberal and regular income.

When Capitalists loan their own money, they experience loss and inconvenience from being paid off by Borrowers; from difficulty in obtaining sound and sufficient securities; and from the apprehension of risk when money lies in their hands. By the constitution and economy of the PROVIDENT INSTITUTE OF VICTORIA, sufficient securities are available; interest full and continuous; apprehension and risk avoided.

Profits

Are ascertained half-yearly, when the smallest deposit receives its just proportion.—Interest is payable in January and July, for every perfect month, closing with each respective half-year, and may be received at the Offices of the Institute, or deposited for accumulation.

Freehold Estate.

Deposit monies are advanced on, and only on, Freehold Estate; the terms of repayment (as to amount and time) being fixed, equitable, and sure. In every case of Loan, the Official Management not only strictly ascertain the validity of title, but also that the property mortgaged exceeds, by two-thirds in value, the sum lent; so as to afford, in all circumstances, ample security to the Institute, and to every Depositor.

Withdrawal.

Money is received for definite periods, or subject to a notice for withdrawal; but—it being the object of the Institute to unite a sound system with all possible accommodation, under ordinary circumstances—parties may withdraw the whole, or any part, of their deposit.

Management.

The principles and economy of the Institute take it wholly out of the category of *Banks of Discount and Issue, Savings Banks, and Benefit Societies*. In the latter projects, an effective check and responsible control ever have been, and ever will be, a desideratum. In the Institute every transaction passes under an avowed Directorial Management; even the Voucher of a Deposit of One Pound is signed by two Directors, passes through the Minute Book, is entered in a Register, bears interest, and is payable as fixed at time of lodgment, and, also, transferable at any time; the aggregate Deposit is loaned on, and only on, Freehold Property of abundant value; a full Board assembles twice a-week; every operation is under Directorial Supervision daily; and the entire business is conducted under approved regulations—the tried and approved regulations of the parent establishment in the United Kingdom.

Financial Agency.

The Agency Department effects the Purchase, Sale, or Mortgage of Land, Buildings, &c.; and Collects and Pays Rents, Dividends, Interest, &c., on Commission; Receipts paid over, or deposited in the Bank Department.

Advantages held out to the Insured by this Company:

Moderate Premiums carefully and judiciously adapted to the nature of the risk.

Ample security comprised in a Capital of £500,000, which, with the double liability of each Shareholder, is equivalent to a fund of ONE MILLION STERLING.

When the limited field of operation is considered, this is a much larger Security to the Insured than is presented by any other office, whether Colonial or British, now in operation in this province.

PROMPT SETTLEMENT OF LOSSES.

By reference to the Policies of this Company, it will be seen that they contain no unreasonable exceptions from risk, the Company's wish being to secure to the Assured a speedy settlement in full, without any unnecessary deductions.

LONG & NEILD,
Chemists and Druggists,
183 BOURKE STREET EAST,

MELBOURNE,

ESTABLISHED 1843.

Conscious of the reputation which their Establishment possesses, and which it long ago acquired, through the zeal and enterprise of the original proprietor, Mr. D. R. Long, Sen., Long and Neild feel that they can well afford to decline adopting the tone of self-laudation, which is so largely characteristic of public announcements in this city. They prefer to rely upon the more substantial merits of **GOOD DRUGS** and **CAREFUL DISPENSING**; merits, they conceive, which do not require the coloring of puffery to ensure their proper estimation.

Since their succession to the business, Long and Neild have endeavored to keep up that good name, the possession of which affords them so much satisfaction; and they take this opportunity of gratefully acknowledging the support they have received, as well from the old Friends of the firm as from the general Public.

They think it due to themselves to state that Mr. Neild is a legally qualified Medical Practitioner. This announcement is not made with any intention of encroaching upon the presumed privileges of those members of the profession who confine themselves to prescribing solely, but as it is known that great numbers of persons are in the habit of applying to Chemists for the relief of trifling ailments, as well as for the alleviation of graver maladies, which pecuniary reasons forbid them submitting to the regularly practising Surgeon, they very respectfully suggest to that portion of the public the advantage of **GRATUITOUS SKILLED ADVICE**.

They are expecting shortly from England a number of **NEW PREPARATIONS**, and they are making arrangements to secure a regular supply of such articles as the progress of medical science is continually adding to the list of the *Materia Medica*.
