MEDICAL CARD.

EDWARD MYERS, M.D.,

DULY QUALIFIED MEDICAL PRACTITIONER,

From PERU, and legally registered by the Medical Board of Victoria,

Hereby notifies to the public that he has commenced the practice of his profession.

Dr. Myers has for a number of years, both in North and South America, made the diseases of a malignant type, such as Cancer (without operation), Glandular Swellings, Ulcers, Scrofula, Rheumatism, Gout, and other affections arising from impurity of the blood, a Speciality.

His unqualified success fully justifies him in asserting with confidence that he can relieve and cure the most desperate cases, evidences of which may be seen by visiting him.

Diseases peculiar to Females treated with marked success.

Consultations from nine a.m. till one p.m., and in the evening from six to eight p.m., at his offices; also at patients private residences by appointment.

Dr. M. cheerfully proffers his services to the suffering poor gratuitously, on the recommendation of a clergyman or a magistrate.

ANIMAL GUANO AND CONVERTING WORKS

ON HOBSON'S RIVER, FOOTSCRAY.

ESTABLISHED 1855.

TOWN OFFICE AND STORE;—32 KING STREET, MELBOURNE.

JAMES MACMEIKAN & CO.,

Whose Artificial Manures have stood the test here for sixteen years, are the Pioneers of the Manure Trade in the Australian Colonies. As a proof of success they would call the attention of the Agricultural public to the above new and extensive works, and the Manures manufactured by them, with the several awards, as under:—

Received the **GOLD MEDAL** at the Great International Exhibition, London, for 1862; a **FIRST-CLASS CERTIFICATE**, awarded by the Commissioners of the Victorian Exhibition, 1862; as well as a **BRONZE MEDAL** at the Batavian Exhibition 1865; and another honour is added to their list of Prizes, given by the Commissioners of the Intercolonial Exhibition of 1866, for their Manufactured Manures—the **ONLY MEDAL** awarded in this class; and at the Sydney Agricultural Exhibition, 1870, the **GOLD MEDAL** was awarded against a number of competitors, which places their Manures second to none in the world.

J. M. & Co.'s valuable Manures are held in high favour throughout Europe and these Colonies, and are extensively used in the Coffee and Sugar Plantations of Ceylon, Mauritius, Batavia, &c. Wherever used, J. M. & Co.'s Fertilisers speak their own praise. J. M. & Co. have always employed the best analytical talent in the Colony for the purpose of insuring First-class Manures, and it is by this means and only manufacturing All Manures they have held their own against all comers.

BONE DUST.—Its advantages as a fertilising agent are—purity and portability combined. By its use, the growth of weeds (which are invariably produced by stable or farm-yard manure) is absolutely prevented, and the ease with which a large extent of land may be dressed is an important advantage, as wages are a serious item in the Colonies. Again, the lasting properties of this manure in light soils are very considerable, its action having been estimated, in the first and second years from 25 to 30 per cent., in the third from 20 to 25, and in the fourth from 10 to 15.

SUPERPHOSPHATE OF LIME (BETTER KNOWN AS DISSOLVED BONES).—This invaluable Manure is one which J. MACMEIKAN & Co. have prepared at considerable expense, and they trust, from its well-known merits, to receive large orders.

ANIMAL GUANO.—This is a highly Ammoniacal Manure, prepared with Sulphuric Acid and Steam, at a high temperature, under **LETTERS PATENT**, the Ammonia being sufficiently fixed so that the plant can draw it off as it requires stimulating; highly recommended. **COFFEE AND TOBACCO MANURE** is the Animal Guano, with the required quantities of Potash and Sulphate of Magnesia added.

PRICES FREE ON BOARD OR AT STORE.

SUPERPHOSPHATE OF LIME	£10 0s. per ton.	PATENT ANIMAL GUANO	£6 10s. per ton.
BONE DUST	6 10s. "	COFFEE AND TOBACCO MANURE	7 10s. "

Bags Included.

Orders by Post, direct to the Office and Store, 32 King-street, Melbourne, will have prompt attention.

STOCKS OF THE ABOVE MANURES ALWAYS KEPT ON HAND.

* Bags included, or if in Air-tight Casks (suitable for rum or molasses) 22s. per ton additional.

* NOTE.—Any of the above Manures can be compressed by our patent process into Bricks 6 by 6 by 3, 25 feet to the ton weight, reducing them into one-half their original bulk, thus saving the Ammonia and volatile gases, consequently reducing the smell to a minimum.

PHASES OF THE MOON.

First Quarter 6d. 7h. 7m. a.m.
 Full Moon 14d. 2h. 3m. a.m.
 Last Quarter 22d. 6h. 10m. a.m.
 New Moon 29d. 3h. 7m. a.m.

THE GARDEN. — Cucumbers should now be watered, but not over the leaves, and always after sunset. Sow succession crops, and transplant where necessary. Prick out celery in the trenches, care being taken to select the finest heads; also plant out lettuces and endive. Collect seeds where ripe, and bend down the heads of onions, if drooping. All the beds should be well looked to and weeded, and this is the best time for making walks. All surplus shoots and spurs should be carefully removed from the grape vines. Those running too high should be lopped off, as also the straggling branches; and when the foliage is too thick, some of the leaves should be removed.

THE FIELD.—This is the last month for getting in the barley crop. Continue to cut and cure tobacco. Hops are now fit for picking, and the maize crop will require to be carefully attended to.

February.

XXVIII. DAYS.

D	D	W	IMPORTANT EVENTS.	H	M	H	M	D.
1	S	S	Nelson, N.Z., founded, 1842	5	15	7	12	3

28	F	F	Supre. Ct. Auckland, opd. 1842	5	45	6	40	1

PHASES OF THE MOON.

First Quarter 4d. 7h. 46m. p.m.
 Full Moon 12d. 9h. 13m. p.m.
 Last Quarter 20d. 9h. 3m. p.m.
 New Moon 27d. 1h. 2m. p.m.

THE GARDEN.—Watch the opportunity of rain to sow turnips, cabbages, peas, beans, radishes, &c. Plant out cauliflowers, cabbages, savoy, brocoli, lettuces, and leeks, which should be watered regularly every evening till they become strong. Earth up potatoes. Every description of fruit and other trees may now be budded, and the orchard cleared of insects, &c. Remove the weeds from flower borders. Propagate shrubs and herbs, and lay plants, such as pinks and carnations.

THE FIELD.—Get in the wheat harvest. Break up the ground for next season, immediately after the crop has been removed, and cross plough land broken up the previous winter or spring. Clean the plantations of hops, maize, or tobacco. Towards the latter end of the month the cutting of the tobacco may be commenced.

March.

30	S		5th Sunday in Lent	6	13	5	55	2
31	M		Paris Exhibition opened, 1867	6	14	5	54	3

PHASES OF THE MOON.

First Quarter 6d. 11h. 5m. a.m.
 Full Moon 14d. 3h. 24m. p.m.
 Last Quarter 22d. 7h. 59m. a.m.
 New Moon 28d. 10h. 34m. p.m.

THE GARDEN.—Sow and plant successional crops of broccoli, cabbages, spinach, &c. Sow onion seed for early pulling, and get in the old crop. Thin turnips sown last month, and sow fresh seed. This is the latest month for planting celery. Examine vines as the grapes continue to ripen, and when the leaves are too thick they should be removed. Prune away lateral shoots, and see that all others are in their proper places. Wall and espalier trees should now be carefully attended to, and all loose branches carefully secured. Early flowering bulbs may be planted during this month.

THE FIELD.—Sow mangel wurzel, and towards the end of the month sow wheat. Maize, in forward districts, is now beginning to ripen. Attend to the sweating and curing of tobacco. Sow Cape barley, tares, &c., for early spring food.

April.

PHASES OF THE MOON.

First Quarter 5d. 4h. 16m. a.m.
 Full Moon 13d. 7h. 31m. a.m.
 Last Quarter 20d. 8h. 27m. p.m.
 New Moon 27d. 8h. 22m. a.m.

THE GARDEN.—Plant out lettuce, onions, and radishes intended for early pulling. Celery plants should be earthed up in the trenches. Transplant a general crop of cabbages, &c.; also plant out cauliflowers in rich ground, and sow seed of same. Sow early peas, beans, &c. Asparagus seeds will now be ripe, and the stems, after the seeds are gathered, should be bent down to decay, or cut off and left on the bed. Remove suckers from all different kinds of fruit trees, as well as any shoots that may arise in the main stem below the budded or grafted part. Make plantations of indigenous trees, shrubs, and herbaceous plants.

THE FIELD.—Sow Cape barley and tares; also wheat, in the beginning of the month. The maize crop is now fit for pulling, and the second cutting of tobacco is also ready. The general crop of potatoes now begins to be fit for digging.

May.

PHASES OF THE MOON.

First Quarter 4d. 10h. 13m. p.m.
Full Moon 12d. 8h. 58m. p.m.
Last Quarter 19d. 8h. 40m. p.m.
New Moon 26d. 7h. 0m. p.m.

THE GARDEN. This is one of the most active months in the year for horticultural purposes. All vacant ground should now be prepared by digging or trenching for the crops of the ensuing seasons, and the requisite dressing of manure must now be laid on. Crops for early use may be put in, and successional crops sown or transplanted when necessary. The spinach beds should now be thinned out, the ground forked between the rows, and well watered with liquid manure. If early asparagus be required, it should now be looked to and forced. Continue to earth up celery plants. Fruit trees, generally, may now be pruned; but care must be taken not to remove any of the wood till it is ripe.

THE FIELD.—Continue to sow wheat, but do not defer it longer. Sow also Cape and English barley. White and yellow turnips are now fit for pulling. This is a good season for felling and splitting timber.

June.

PHASES OF THE MOON.

First Quarter 3d. 3h. 59m. p.m.
Full Moon 11d. 7h. 41m. a.m.
Last Quarter 18d. 1h. 11m. a.m.
New Moon 25d. 6h. 52m. a.m.

THE GARDEN.—Sow two crops of peas, beans, prickly spinach, cabbage, carrots, raddishes, and small salad. For the second crop sow early peas and early York, as also large sugar-loaf cabbages. Transplant cabbages, cauliflowers, leeks, onions and eschalots, straw, berries, and artichokes. Continue the general pruning, and remove and transplant fruit trees where wanted. Divide the roots of and otherwise propagate the various kinds of herbaceous plants.

THE FIELD.—Sow spring barley, but in fine soil. Continue cross ploughing for peas, and the breaking-up of new ground for maize. Fallows intended for turnip should also receive a cross-ploughing of good depth. The time is also favorable for forming ditches and underground drains, which are of essential necessity, in soils having a substratum impervious to water.

Last Quarter 17d. 6h. 38m. a.m.
New Moon 24d. 8h. 14m. p.m.

THE GARDEN.—Plant lettuces, brocoli, eschalots, and the main crop of cabbages and cauliflowers. Sow prickly spinach, carrots, radishes, early cucumbers, melons, peas, cabbage, brocoli, parsnips, onions, leeks, celery, lettuces, endive, stone turnips, mustard and cress, also parsley, along the edges of the walks. A full crop of the large kinds of broad beans may also be sown. Finish the winter dressing of asparagus, artichoke, and sea kale, and the blanching of the latter may be attended to. Prune gooseberries, currants, and other small kinds of fruit trees, and plantations of the same may now be made at seven feet apart. Dig flower borders as the bulbs make their appearance above the surface.

THE FIELD.—Land intended for potatoes and tobacco should now be ploughed and otherwise prepared, and the planting of potatoes may be commenced.

August.

New Moon 23d. 11h. 10m. a.m.
First Quarter 31d. 1h. 28m. p.m.

THE GARDEN.—Continue to make fresh plantations of cabbages, and draw earth to those crops formerly planted. Make a plantation of Savoy, Scotch kale, Brussels sprouts, and red cabbage. Sow more cauliflower seed, and transplant those remaining in the seed beds. Sow a general crop of carrots and parsnips. Select out some of the finest roots to produce seed. Sow celery, parsley, radishes, pot-herbs, small salad, spinach, and peas. Prune plum, and graft fruit trees. Sow seeds of the hardy annuals, and continue to dig flower borders.

THE FIELD. Sow peas early as possible. Sow tobacco, and protect the young plants from frost. Continue preparing ground for maize; that which has borne turnips should be cleared, and sown with English barley, about three bushels to the acre. Rye may now be sown, and the wheat crops rolled. Hopplants will require cutting and dressing; select best sets for planting.

September.

THE GARDEN.—Sow cucumbers, cabbages, and brocoli. Lose no time in sowing the general crop of onions. Make new plantations of asparagus when requisite, choosing the best situations and the richest soil. Give the old asparagus beds a spring dressing. Continue sowing succession crops of peas and beans. Sow flax spring crop of early turnips. Sow spinach every fortnight. Potatoes may be planted for a general main crop. Sow celery and radish, and make fresh plantations of sweet herbs. Finish pruning trees generally. Make plantations of vine cuttings of the most approved kinds. Graft fruit trees. Sow tender and hardy annuals.

THE FIELD.—Towards the end of this month sow maize, Swedish turnips, tobacco, lucerne, and all kinds of artificial grasses

 Last Quarter 13d. 4h. 5m. p.m.
 New Moon 21d. 8h. 35m. p.m.
 First Quarter 29d. 9h. 50m. a.m.

THE GARDEN.—Sow kidney beans and scarlet runners. Transplant turnips, cabbages, and savoy. Sow turnips and early white and purple brocoli. Peas, beans, and other plants should be hoed up. Chili pepper, capsicums, and tomatoes, may be sown in boxes or on a warm border. Everything will now require watering of an evening, but care should be taken not to wet the plants. Where nectarine or peach trees are too much crowded with fruit, they must be thinned. Destroy all weeds as they make their appearance on the borders, and finish all kinds of flower seeds.

THE FIELD.—Finish the planting of maize and potatoes as early as possible. Ground on which timber is felled and burned should now be ploughed, for the purpose of receiving wheat in the following autumn. Fallow ground for turnips may now be harrowed down, and afterwards plough into ridges.

November.

PHASES OF THE MOON.

Full Moon 5d. 1h. 28m. a.m.
 Last Quarter 12d. 10h. 28m. a.m.
 New Moon 20d. 1h. 17m. p.m.
 First Quarter 27d. 5h. 53m. p.m.

THE GARDEN.—The operations of 1st month may be repeated here, especially if the weather should be moist. Continue the sowing and transplanting of successful crops of every description. Vacant ground should be prepared for fresh crops, and plants earthed up, and if necessary, watered every evening. The tomatoes and capsicums should be transplanted into a fine rich mould with a warm but sheltered aspect. Asparagus will soon be ready, but care must be taken not to cut the underground roots or tubers. Globe artichokes are also fit for cutting. Remove useless shoots from the various growing trees, retaining those necessary for the next year's supply. Cut up all the weeds as they appear, and continue the transplanting of the several kinds of annuals, biennials, perennials, and herbaceous plants.

THE FIELD.—Attend carefully to young tobacco, and well clean the ground. Finish ploughing new land, and at the end of the month. Swede turnips may be sown.

December.

PHASES OF THE MOON.

Full Moon 4d. 2h. 0m. p.m.
 Last Quarter 12d. 7h. 34m. a.m.
 New moon 20d. 4h. 29m. a.m.
 First Quarter 27d. 1h. 45m. a.m.

THE GARDEN.—Sow more peas in wet weather, and seeds of sugar-loaf and other quick-growing cabbages. Plant out others from the seed beds. Gather medicinal and other herbs. Finish cutting asparagus. Plant celery in trenches to bleach. Sow a crop of turnips, and hoe and thin the crops formerly sown. Transplant leeks, and lettuce, and keep up successional crops of radishes. Continue to pay attention to the fruit garden, as recommended last month, and place sticks to trees newly planted, or likely to be affected by the winds.

THE FIELD.—Finish sowing Swede turnips when they are in rough leaf, the ground should be well rolled; and, after being harrowed, give them a first hoeing, and set them out wide. The maize crops and potatoes must now be charred and earthed up, and tobacco plants attended to, by pulling out suckers and removing the superfluous leaves.
