MELBOURNE AND BALLAARAT PATENT CHEMICAL MANURE WORKS, 21 A'Beckett Street, Melbourne.

TESTIMONIALS.

DR. MUELLER'S TESTIMONIAL.

It affords me much pleasure to state that Mr. J. C. Lyon's Phosphoric Potash Manure has been very advantageously used in this garden for promoting a healthy and vigorous growth of many plants, as well in the conservatory as open ground.

This fertilising composition, inasmuch as it contains in considerable quantity all the principal elements required for vegetable nutrition, cannot fail to take a high place among artificial manures.

FERD. MUELLER, M.D., F.R.S.

PHASES OF THE MOON.

First Quarter 3d. 1h. 43m. p.m.
Full Moon 10d. 8h. 33m. a.m.
Last Quarter 17d. 2h. 44m. a.m.
New Moon 25d. 4h. 58m. a.m.

THE GARDEN.—Cucumbers should now be watered, but not over the leaves, and always after sunset. Sow succession cress, and transplant where necessary. Prick out celery in the trenches, care being taken to select the finest heads; also plant out lettuces and endive. Collect seeds where ripe, and bend down the heads of onions, if drooping. All the beds should be well looked to and weeded, and this is the best time for making walks. All surplus shoots and spurs should be carefully removed from the grape vines. Those running too high should be lopped off, as also the straggling branches; and when the foliage is too thick, some of the leaves should be removed.

THE FIELD.—This is the last month for getting in the barley crop. Continue to cut and cure tobacco. Hops are now fit for picking, and the maize crop will require to be carefully attended to,

February.

THE GARDEN. This is one of the most active months in the year for horticultural purposes. All vacant ground should now be prepared by digging or trenching for the crops of the ensuing seasons, and the requisite dressing of manure must now be laid on. Crops for early use may be put in, and successive crops sown or transplanted when necessary. The spinach beds should now be thinned out, the ground forked between the rows, and well watered with liquid manure. If early asparagus be required, it should now be looked to and forced. Continue to earth up celery plants. Fruit trees, generally, may now be pruned; but care must be taken not to remove any of the wood till it is ripe.

THE FIELD.—Continue to sow wheat, but do not defer it longer. Sow also Cape and English barley. White and yellow turnips are now fit for pulling. This is a good season for felling and splitting timber.

THE GARDEN.—Sow two crops of peas, beans, prickly spinach, cabbage, carrots, radishes and small salad. For the second crop sow early peas and early York, as also large sugar-loaf cabbages. Transplant cabbages, cauliflowers, leeks, onions and eschalots, straw, berries, and artichokes. Continue the general pruning, and remove and transplant fruit trees where wanted. Divide the roots of and otherwise propagate the various kinds of herbaceous plants.

THE FIELD.—Sow spring barley, but in fine soil. Continue cross ploughing for peas, and the breaking-up of new ground for maize. Fallows intended for turnip should also receive a cross-ploughing of good depth. The time is also favorable for forming ditches and underground drains, which are of essential necessity, in soils having a substratum impervious to water.

Sow prickly spinach, carrots, radishes, early cucumbers, melons, peas, cabbage, brocoli, parsnips, onions, leeks, celery, lettuces, endive, stone turnips, mustard and cress, also parsley, along the edges of the walks. A full crop of the large kinds of broad beans may also be sown. Finish the winter dressing of asparagus, artichoke, and sea kale, and the blanching of the latter may be attended to. Prune gooseberries, currants, and other small kinds of fruit trees, and plantations of the same may now be made at seven feet apart. Dig flower borders as the bulbs make their appearance above the surface.

THE FIELD.—Land intended for potatoes and tobacco should now be ploughed and otherwise prepared, and the planting of potatoes may be commenced.

THE GARDEN.—Continue to make fresh plantations of cabbages, and draw earth to those crops formerly planted. Make a plantation of Savoy, Scotch kale, Brussels sprouts, and red cabbage. Sow more cauliflower seed, and transplant those remaining in the seed beds. Sow a general crop of carrots and parsnips. Select out some of the finest roots to produce seed. Sow celery, parsley, radishes, pot-herbs, small salad, spinach, and peas. Prune plum, and graft fruit trees. Sow seeds of the hardy annuals, and continue to dig flower borders.

THE FIELD. Sow peas early as possible. Sow tobacco, and protect the young plants from frost. Continue preparing ground for maize; that which has been turned should be cleared, and sown with English barley, about three bushels to the acre. Rye may now be sown, and the wheat crops rolled. Hop plants will require cutting and dressing; select best sets for planting.

THE GARDEN.—Sow kidney beans and scarlet runners. Transplant leeks, cabbages, and savoy. Sow turnips and early white and purple brocoli. Peas, beans, and other plants should be hoed up. Chili pepper, capsicums, and tomatoes, may be sown in boxes or on a warm border. Everything will now require watering of an evening, but care should be taken not to wet the plants. Where nectarine or peach trees are too much crowded with fruit, they must be thinned. Destroy all weeds as they make their appearance on the borders, and finish all kinds of flower seeds.

THE FIELD.—Finish the planting of maize and potatoes as early as possible. Ground on which timber is felled and burned should now be ploughed, for the purpose of receiving wheat in the following autumn. Follow ground for turnips may now be harrowed down, and afterwards plough into ridges.

THE GARDEN.—The operations of last month may be repeated here, especially if the weather should be moist. Continue the sowing and transplanting of successful crops of every description. Vacant ground should be prepared for fresh crops, and plants earthed up, and if necessary, watered every evening. The tomatoes and capsicums should be transplanted into a fine rich mould with a warm but sheltered aspect. Asparagus will soon be ready, but care must be taken not to cut the underground roots or tubers. Globe artichokes are also fit for cutting. Remove useless shoots from the various growing trees, retaining those necessary for the next year's supply. Cut up all the weeds as they appear, and continue the transplanting of the several kinds of annuals, biennials, perennials, and herbaceous plants.

THE FIELD.—Attend carefully to young tobacco, and well clean the ground. Finish ploughing new land, and at the end of the month. Swede turnips may be sown.

PHASES OF THE MOON.

Last Quarter 7d. 7h. 14m. a.m.
 New Moon 14d. 11h. 13m. a.m.
 First Quarter 22d. 2h. 8m. p.m.
 Full Moon 29d. 11h. 28m. p.m.

THE GARDEN.—Sow more peas in wet weather, and seeds of sugar-loaf and other quick-growing cabbages. Plant out others from the seed beds. Gather medicinal and other herbs. Finish cutting asparagus. Plant celery in trenches to bleach. Sow a crop of turnips, and hoe and thin the crops formerly sown. Transplant leeks, and lettuce, and keep up successional crops of radishes. Continue to pay attention to the fruit garden, as recommended last month, and place sticks to trees newly planted, or likely to be affected by the winds.

THE FIELD.—Finish sowing Swede turnips when they are in rough leaf, the ground should be well rolled; and, after being harrowed, give them a first hoeing, and set them out wide. The maize crops and potatoes must now be charred and earthed up, and tobacco plants attended to, by pulling out suckers and removing the superfluous leaves.
