Weather. Lucy Guerin is one of the most original and influential choreographers in Australia, who develops her movement-based work by experimenting with voice, video, sound, and even industrial design. Her most recent piece *Weather* thrillingly explores our complex relationship with the environment. Integrating physical sensation and textural sound with a shifting sculptural design, this arresting work uses the dynamic patterns of weather systems to create an immersive experience that celebrates the physical body's connection to the natural world.

"A STUNNING SHOWCASE OF EXTREMELY TALENTED DANCERS WHO PERFORM WITH A BEAUTIFULLY UNDERSTATED INTENSITY." -Australian Stage
